

Retrofit Package: **Protection of photo cell from abrasive dust**

Steinemann Upgrade Photo Cell Protection

Description

The photo cell monitoring the belt tracking will be protected by a specially designed box. A constant air flow, generated through over pressure, will avoid that dust and dirt enters into the box where the sensor of the photo cell is installed.

Suitable for

- Satos, Nova-H

Advantages

The protection of the photo cell from abrasive dust and particles is crucial for consistent, undisturbed belt oscillation so that the sanding quality and process stability are assured.

Content Package

- Box with photo cell support
- Fan
- Tubing
