

## SprintSystem – the innovative sanding platen solution

The combination of the permanently installed SprintPlaten and the exchangeable SprintInsert (patented) gives clear benefits in the sanding process:

### QUALITY

- Excellent panel surfaces
- Extremely low thickness tolerances
- Elimination of assembly errors
- Electrostatic discharge

### AVAILABILITY

- Short changeover times
- 1-man handling for platen and insert
- No bottlenecks from assembly/repairs
- Protection of the platen

### COSTS

- Significantly reduced personnel costs
- No need for sanding platen workstation
- Higher service life of platen
- Reusable insert

### SprintInsert (patented)

	Typ	Hardness	Width	Machine widths
	PES	hard	70 mm	1300 – 3400 mm
	FOAM	soft	70 mm	1300 – 3400 mm
