

## Webinars to boost operator expertise

**Our series of webinars offers you a great opportunity to improve specific aspects of your employees' technical skills, both on the sanding line and the machine itself.**

Complementing our tried-and-tested training courses, individual topics can also be looked at in greater detail. We'd be happy to talk to you about putting together your own, personal webinar.

**Target audience:**

- Sanding line managers and machine operators
- Production and finishing line managers
- Technicians and people who want to learn more about surface processing

**Webinar goal:**

- Improving technical sanding process skills

**Benefits:**

- Improved knowledge of how sanding machines and abrasives work together in an efficient production process
- Being able to understand and apply sanding process product features and quality parameters
- Sanding faults – their causes and solutions
- Knowledge sharing with colleagues and Steinemann experts

**Structure:**

- Four 60-minute sessions
- Presentation: 40 min/Q&A session: 20 min
- Split over 4 days, one session/day
- Platform: MS Teams videoconference

**Interested and would like further details?**
